

Communication and Language

Communication and Language is the foundation for children's learning. In our setting we believe that adults are key in supporting the development of language skills and we strive to provide a language rich environment which will enable all children to develop in this area.

Our staff play an essential role in responding to children's needs. We provide positive interactions and stimulating activities to promote listening and attention skills, understanding and speech development. Staff work closely with parents and carers to support and give advice on ways to develop their child's communication skills.

CRC Article 12: All children have the right to be heard.
