

# Mathematics

Mathematical activities and language play a big part in our learning environment. Through carefully planned activities, we aim to promote memory and counting skills as well skills in matching, sorting, oral language development and spatial awareness.

We believe that Mathematics is an essential life skill that develops a child's understanding and helps to make sense of the world. These pictures show you the enjoyable and beneficial activities we provide in the 2-Year-Old Provision to promote this area of learning.

**CRC Article 28: All children have the right to learn.**
