

Personal, Social and Emotional Development

Personal, Social and Emotional Development supports children's development to help them to interact effectively, and to develop positive attitudes towards themselves and others. It also involves the children learning to look after their bodies and how to manage their personal needs more independently.

In our Provision, we create an environment that develops our children's confidence to enable them to express their own ideas. The children are supported so that they become more independent with their self-care needs and so they learn what it means to be healthy. We encourage our children to use resources co-operatively, and staff model positive interactions to encourage children to be kind, respectful, and to begin to understand the needs of others.

CRC Article 6: All children have the right to develop to their full potential.
