

Mathematics

Mathematics encompasses Number and Numerical Patterns, as well as learning of Shape, Space and Measures. We provide opportunities for mathematical experiences in comparison, counting, cardinality, spatial awareness, shape, pattern and measures. Children learn holistically, through their interests and also enjoy adult-led Maths activities.

Children need lots of first-hand experiences, for example, handling equipment to grasp mathematical concepts. They use mathematical language. Mathematical skills are developed throughout the Nursery including the Home Corner, Construction Area and Book Area, to help them develop positive attitudes and interests in Mathematics.

CRC Article 28: All children have the right to learn.
